

NNPSS-2011 Participant Posters

The main purpose of the poster session is to give the NNPSS participants an opportunity to share some of their research with the other participants, lecturers, speakers and members of the TUNL research community. Some guidelines for making your poster are given below.

- **Poster size may not exceed 3 feet wide x 4 feet high**
 - The maximum dimensions above are in portrait orientation (width × height). Only portrait orientation is allowed.
- **Posters should be designed for clear viewing from a distance of beyond 3 feet so that they can be viewed by a number of people at the same time**
 - Use larger lettering and a minimum of text
 - Use of color can visually enhance your poster
- **Poster Layout**

Plan your poster to present information in a logical sequence. There is not a mandatory poster layout, but you might consider dividing your poster into two sections as below.

Section 1: *(should take less than 25% of the poster)*

 - Title
 - Authors (the presenter's name should be first)
 - Affiliations (use superscripted numbers to make association with authors)
 - Abstract (or research summary)

Section 2:

 - Introduction
 - Research design and methods
 - Results
 - Conclusion
- **Poster setup, presentation and removal**
 - Put your poster up at least 1/2 hour prior to the start of the poster session
 - Poster presenters are requested to be present during poster session to discuss the poster and answer questions
 - Remove your poster immediately at the close of the poster session
